Subject: FW: EOC Spot Report: Chemical Spill, Charleston WV

Eric,

As we discussed here is the initial Spot Report generated for the developing situation in WV. We will include you in future Spot Reports as well. Please coordinate as appropriate so that your Office of Water colleagues are aware of this situation as they will very likely be involved in the EPA response first thing tomorrow morning. Thanks for your assistance.

EOC Spot Report: Chemical Spill, Charleston WV

US Environmental Protection Agency

Report as of 2130 January 9, 2014

Overview: Today there was a chemical spill from the Freedom Industries plant (former Pennzoil Refinery). The spilled chemical was methylcyclohexane, which is reportedly used in coal preparation and processing. The spill went into the Elk River sometime earlier in the day and there was an early report of an odor. The Governor of WV has declared a state of emergency for at least several counties. The Kanawha Valley Water Treatment Plant detected the chemical even after the increased carbon treatment effort was put in place.

State, Local and other Federal Agency Actions: WV issued an order to not drink cook or bathe in the water, which affects approximately 100,000 people. WV is conducting additional water sampling. The Civil Support Team has been reported to be deployed to the WVEOC to assist in supplying water to residents.

EPA Actions: The WV EOC is operational. No request for EPA assistance has been made. An EPA OSC has contacted the WV DEP and offered EPA assistance.

Media Interest: High
